Welcome to the CEI Women's Business Center's guide for small business grants in Maine. We realize that as a small business owner, it may be difficult to invest in the type of innovation, transformational equipment, renovation, professional development, or research that will propel your business forward. Fortunately, there are several local, statewide, and federal funding programs that will provide grant funding.

We invite you to use this guide as you plan for business startup and expansion [that will yield new products and create jobs]. And remember, our advisors are always available to help you determine which of these grant opportunities may be the right fit for you.

Tips for the Grant Search

Timing is Everything – Most grant deadlines are scheduled between January and May, although some opportunities are rolling (e.g. no deadline), and some are available on a monthly basis. However, in many cases, the grant application will not become available until 14 days before the deadline. In other instances, you may be required to submit a brief Letter of Interest (LOI); if approved, you will be invited to submit a full application that is due 1-2 months after approval. Deadlines also change without warning. You should plan to frequently monitor the websites of any grants for which you might apply.

Beware of Scams – Do not apply for grants that require an entry fee. Always read the Official Rules and confirm that the rules state that no entry fee is required and that a purchase does not improve an applicant's likelihood of receiving funds. Please note that this caveat does not apply to the grant opportunities that are available only to members of credible organizations like the National Association for the Self Employed, which may require paid memberships. Additionally, be sure you know who you're sending personal business or financial information to. For example, any official email from the SBA (Small Business Administration) will end in @sba.gov. Be leery of outside organizations posing as the SBA, or other funders.

Understand Who Is the Eligible Applicant – With many state and federal grants, the official applicant must be the Town or City in which your business is located, even if the project benefits you as a business. Before applying, contact your municipal office to discuss the grant opportunity and the process your municipality has for grant applications. You may need to ask your Town or City Council for approval and advertise a Public Hearing for local input.

Tips for Applying

Prepare Your Application Ahead of Time – Grant applications require extensive financial and organizational documentation as well as a compelling narrative that explains why you are requesting funding. This can take time to prepare, especially when you are running a business, so do not wait for the application open period to begin your application. Search for the previous year’s grant application to familiarize yourself with the requirements and questions. Typically, the applications do not change substantially year to year, and you’ll have plenty of time to adapt to any changes once the new application is available.

Get an Extra Set of Eyes to Read Your Application – Funders do not know your business as well as you do, so it can be helpful to get an outside perspective. Is your application easy to understand? Does it convey the importance of funding for your business growth and local economic development? Ask an advisor, savvy friend, or fellow business owner to help; you don’t need to pay someone to do this review for you.

Incorporate A Broader Context – Use relevant statistics, U.S. Census data, industry studies, and news reports to lend authority to your narrative. Keep the data focused, not too broad – choose local or statewide facts over global statistics. How widespread or severe is the problem affecting your business within Maine? Who does your business serve in Maine? How has your proposed solution to the problem been used successfully by others in your industry? For example, if you are requesting funds to improve your façade, reference a study that describes how consumers are influenced by attractive storefronts. If you are an employer, use U.S. Census statistics to compare your workers’ wages with the median wage in your county.

Know Your Funder – Understand what is important to your funder and tailor your application to it. You can find a funder’s mission and values on the funder’s website. While you’re researching, look at the types of projects the funder has previously funded and ensure that your proposed project aligns well with them. Sign up for their e-newsletter and follow them on social media to understand what current issues they’re talking about.

Vocabulary

Entitlement Community: Specific municipalities which receive their own Community Development Block Grant (CDBG) fund allocation. If your business is located in one of these communities, you would apply to the municipality, not the State of Maine's Dept. Economic & Community Development. Entitlement Communities include: Auburn, Bangor, Biddeford, Lewiston, Portland, and all other municipalities of Cumberland County except for Brunswick, Casco, and Frye Island.

Match: Many grant programs require matching funds, or match. This is additional funding to supplement the grant funds and complete the project. Depending on the organization, eligible sources of match may or may not include: your own investment; other grants; loans; in-kind donations, time, services (e.g. a graphic designer agrees to work for free for you); or your own labor and investment. In addition, a funder may require that the match not be expended before you receive their grant funds. It's important to understand how each grantor defines match – review the grant application carefully for details.

TIF: Tax Increment Financing (TIF) is a tool to encourage investment in under-developed, blighted areas. Administered by each municipality, a TIF district allows developers of properties within the district to recover a portion of the property tax increase that their development generates. For example, if a developer redevelops a blighted building, the property tax valuation increases from \$5 to \$10. Under a Credit Enhancement Agreement (CEA) signed with the municipality, the developer may recover a portion of the \$5 increase in order to offset some of the expenses of development. The remaining property tax gain will go to a TIF fund designed to support designated economic development projects.

Grants for Small Businesses

The following list of grants for small businesses is organized by how the grant funds may be used. Please note that the deadline may change year to year; we encourage you to research these grant opportunities using the given websites for updated information.

Note: *This resource was originally published in November of 2023. Grant opportunities are fluid and likely to change, and we're doing our best to keep this list current. If you are aware of information that needs to be updated or corrected, please email the CEI Women's Business Center at wbc@ceimaine.org*
